Subject: Clarification

Mike, when we were in the Park today, I mentioned that I thought the floating air monitoring station was going to have samplers on it for COPC's. You thought it wasn't. Turns out that on the River-based floating station, there will be 1 PUF sampler and 1 PQ-100 sampler run by a generator. Not sure if that clarification will affect your request for a third COPC sampling station on land that we discussed today.
